Bremerton Municipal Code
<p>15.06.030 RATES - WATER. (a) (2) Temporary/Construction Water Meters. Persons desiring temporary water service from a fire hydrant, hose connection, or meter for the purposes of construction, special events, or other activities that are limited in duration shall make application to the Department on the form provided and make a deposit established for temporary/construction water meters. A deposit based on meter size shall be assessed for temporary/construction water meters. The deposit may be retained by the City to recover damage, loss, or any misuse of the water meter.</p> <p>Temporary/construction water meters shall be limited to twelve (12) month duration. The twelve (12) month limitation allows for billing meter calibration and yearly testing of backflow prevention devices. If the applicant requires a temporary/construction water meter for longer than twelve (12) months, the applicant must reapply.</p> <p>Access to the temporary/construction meter must be available to the department to inspect and read at any reasonable time.</p> <p>The rate shall be calculated on a periodic billing with a minimum service charge based on the water meter size and a commodity charge computed to the nearest HCF.</p>
